

Designing Experimental Research in Archaeology is a guide for the design of archaeological experiments for both students and scholars. Experimental archaeology provides a unique opportunity to corroborate conclusions with multiple trials of repeatable experiments and can provide data otherwise unavailable to archaeologists without damaging sites, remains, or artifacts. Each chapter addresses a particular classification of material culture—ceramics, stone tools, perishable materials, composite hunting technology, butchering practices and bone tools, and experimental zooarchaeology—detailing issues that must be considered in the development of experimental archaeology projects and discussing potential pitfalls. The experiments follow coherent and consistent research designs and procedures and are placed in a theoretical context, and contributors outline methods that will serve as a guide in future experiments. This degree of standardization is uncommon in traditional archaeological research but is essential to experimental archaeology. The field has long been in need of a guide that focuses on methodology and design. This book fills that need not only for undergraduate and graduate students but for any archaeologist looking to begin an experimental research project.

Investing in Protection: The Politics of Preferential Trade Agreements between North and South, What Does It Mean to Be Five?, The Venezuelan Question and the Monroe Doctrine, a Lecture Delivered in Response to an Invitation of the Literary Societies of the University of Wisconsin, January 10, 1896, The Philanthropy of George Soros: Building Open Societies, Thoughts out of Season Part 1, Noetic Science Exploring the Power of Collective Consciousness, Football as a war game: The annotated journals of General R.R. Neyland, Economic Reform and Employment Relations in Vietnam (Routledge Studies in the Growth Economies of Asia), Calamity at Chancellorsville: The Wounding and Death of Confederate General Stonewall Jackson, Spatial Analysis for the Social Sciences (Analytical Methods for Social Research),
