

Packed with superlative history and human drama, EXPLORERS OF AUSTRALIA is truly a voyage of discovery. The story of how Australia incognita gradually became known to the outside world is perhaps the greatest Australian story of all. It is a story of courage, folly and ambition that begins with the first outsiders footsteps on an alien shore and ends with the penetration of the central deserts centuries later. EXPLORERS OF AUSTRALIA takes a new look at the famous and forgotten names of Australian exploration, men, who motivated by dreams of wealth or scientific curiosity, risked all to chart the unknown. Geoffre Badger pays particular attention to the challenges of navigation, diet and geography to reveal how the explorers came to defeat them.
