

Labyrinths of Power: Political Recruitment in Twentieth-Century Mexico (Princeton Legacy Library)

Peter Smith has written a comprehensive and in-depth study of the structure and more important of the transformation of the national political elite in twentieth-century Mexico. In doing so, he analyzes the long-run impact of the Mexican Revolution of 1910 on the composition of the countrys ruling elite. Included in his focus are such issues as the social basis of politics, the recruitments process, political career patterns, the amount of periodic turnover, and the relationships between the political and economic elites. The author explores these issues through an empirical, computer-assisted investigation of biographical information on more than 6,000 individuals who held national political office in Mexico at any time between 1900 and 1976. He then employs various comparative and statistical techniques, along with a use of archival data, questionnaires, and interviews, to determine precisely how Mexicos political system actually works. Professor Smith finds that the Revolution of 1910 did not fundamentally alter the class composition of the national elite, although it did redistribute power within it. He further observes that the Mexican Revolution did bring about a separation of political and economic elites, and that the route to political success is much more varied and less predictable now than before the revolutionary period.
