

Winner of the 1998 Paul A. Samuelson Award given by TIAA-CREF, *The Evolution of Retirement* is the first comprehensive economic history of retirement in America. With life expectancies steadily increasing, the retirement rate of men over age 64 has risen drastically. Dora L. Costa looks at factors underlying this increase and shows the dramatic implications of her findings for both the general public and the U.S. government. Using statistical, and demographic concepts, Costa sheds light on such important topics as rising incomes and retirement, work and disease, the job prospects of older workers, living arrangements of the elderly, the development of a retirement lifestyle, and pensions and politics. [Costas] major contribution is to show that, even without Social Security and Medicare, retirement would have expanded dramatically.—Robert J. Samuelson, *New Republic* An important book on a topic which has become popular with historians and is of major significance to politicians and economists.—Margaret Walsh, *Business History*

I Fear I Shall Never Leave This Island: Life in a Civil War Prison, Adventures of the Dialectic (Studies in Phenomenology and Existential Philosophy), Odd Knights of a Full Moon: A Modern Humans Manifesto to Life, Neocolonialism and Africa in the 1970s, Flowering Plants of Samoa (Bernice P. Bishop Museum Bulletin 128), Comprehending Columbine, Love: A Very Short Introduction (Very Short Introductions),
