

Women on Power: Leadership Redefined

Women have made enormous strides into the professional workplace over the last two decades, yet few have assumed leadership roles in the higher ranks of predominately male occupations: business, politics, the professions, and sport. This pioneering collection by experts in a variety of disciplines combines theoretical discussions with historical and contemporary case studies to offer a fresh vista on how gender has influenced and redefined today's notions of leadership and power. The provocative essays cover a broad range of topics, including the Boston Womens Health Book Collective, global perspectives on womens environmental activism, mothering as a catalyst to social activism, and women in the enclaves of veterinary medicine and sports.
